ABOUT HSNC UNIVERSITY, MUMBAI

HSNC University, Mumbai, established under the Maharashtra Public Universities Act, 2016, is a Cluster University comprising **H.R. College of Commerce and Economics (lead college), K.C. College, and Bombay Teachers' Training College** — three A-Grade, NAAC-accredited institutions of the Hyderabad (Sind) National Collegiate Board.

Strategically located in South Mumbai, these colleges are nationally and globally recognized for their academic excellence, dynamic curriculum, robust industry-academia interface, and innovative research and outreach programs. Their alumni occupy prominent positions across sectors, and students benefit from excellent placement and higher education opportunities.

Formed as a progressive initiative under **RUSA** (Rashtriya Uchcharat Shiksha Abhiyan), HSNC University introduces a liberal, multi-disciplinary education system aligned with global standards. Embracing Education 4.0, it offers both conventional and unconventional programs — from Law, Yoga, and Performing Arts to Music — supported by industry and international collaborations. With autonomy in curriculum design and a strong focus on research, innovation, and entrepreneurship, HSNC University is set to redefine higher education. Indeed, at HSNC University, **“Excellence is the only compelling option.”**

ABOUT B.TECH. IN COMPUTER ENGINEERING

The **Bachelor of Engineering in Computer Engineering** is a dynamic and future-focused undergraduate program that blends the principles of electrical engineering and computer science to develop high-performing computing systems. This program equips students with a strong foundation in hardware design, software development, embedded systems, networking, cybersecurity, and data structures, among other core areas.

Designed to meet the evolving demands of the digital age, the curriculum combines theoretical knowledge with practical skills through hands-on labs, real-world projects, and industry collaborations. Students will learn to design, build, and optimize computing systems that power everything from mobile devices to large-scale cloud infrastructure.

Graduates of this program are well-prepared for careers in software engineering, hardware development, systems architecture, and emerging fields like the Internet of Things (IoT), Artificial Intelligence (AI), and cybersecurity, as well as for pursuing higher education and research opportunities.

PROGRAMME HIGHLIGHTS

- Combines computer science and engineering principles
- Strong focus on software development and hardware systems
- Practical learning through labs, projects, and internships
- Curriculum includes emerging tech: IoT, AI, and cybersecurity
- Industry collaboration for real-world exposure and skill development

CAREER PROSPECTS

- Roles in software engineering, system design, and embedded systems
- Opportunities in cybersecurity, networking, and cloud computing
- High demand in AI, IoT, and data-driven industries
- Suitable for careers in R&D, product development, and consulting
- Excellent pathway to M.Tech, MS, or research in advanced tech fields

ABOUT B.TECH. IN COMPUTER SCIENCE AND ENGINEERING (ARTIFICIAL INTELLIGENCE & MACHINE LEARNING)

Artificial Intelligence (AI) is a branch of computer science focused on enabling machines to perform tasks that typically require human intelligence, such as reasoning, perception, and decision-making. Machine Learning (ML), a vital subset of AI, allows systems to learn and adapt from experience without being explicitly programmed.

This engineering program with a specialization in AI & ML integrates key areas like Mathematics, Programming, Statistics, and Software Design to replicate human cognitive abilities. The curriculum emphasizes practical learning through projects, internships, and hands-on labs, preparing students to build real-world AI solutions. Graduates are well-equipped for careers in leading global and Indian tech companies, as well as for higher studies in emerging technologies.

As AI & ML rapidly transform industries, the demand for skilled professionals is surging. The sector is projected to reach \$40 billion by 2025, growing at a CAGR of 20%, making this field both dynamic and full of opportunity.

PROGRAMME HIGHLIGHTS

- Industry-aligned curriculum with hands-on projects
- Interdisciplinary focus combining logic, data, and design
- Strong foundation in both theory and applied AI/ML
- Emphasis on critical thinking and innovation
- Access to labs, real-world case studies, and research exposure

CAREER PROSPECTS

- In-demand roles in AI product development and automation
- Key contributor roles in tech innovation teams
- Strong fit for analytics, robotics, and cognitive computing sectors
- Competitive edge for roles in global R&D and think tanks
- High employability in emerging tech-driven industries

ELIGIBILITY CRITERIA

First Year Admission:

Candidates must have passed the 10+2 examination with **Physics, Chemistry** and **Mathematics** as compulsory subjects and a minimum of 45% aggregate in PCM (40% marks in case of candidates belonging to reserved category).

Lateral Entry (Direct Admission to Second Year):

Candidates who have completed a three-year Engineering Diploma after 10th in **Computer Science, Information Technology, Electronics** or allied streams are eligible for direct admission to the second year, with a minimum of 45% aggregate across all semesters of the diploma program.

SELECTION CRITERIA

MHT-CET or JEE (main) examination scores will be considered. The aforesaid scores should be current and valid. Candidates who have not appeared for any of the above examinations will be required to appear for H-TCET.
